PROJECT REPORT

ON

IOT ACCESS CONTROL BASED ON FACE RECOGNITION

Submitted in partial fulfillment of requirement

for the award of the degree of

BACHELOR OF SCIENCE

IN

ELECTRONICS

OF

UNIVERSITY OF KERALA

A.AYANA **(Reg.No:340-14-807-001)**
ANJU. S **(Reg.No:340-14-807-006)**
JIYA AJCOB **(Reg.No:340-14-807-017)**
MEENU. S. M **(Reg.No:340-14-807-021)**

NATIONAL COLLEGE

(*Affiliated to University of Kerala*)
MANACAUD P.O., TVPM-009

NATIONAL COLLEGE

(*Affiliated to University of Kerala*)
MANACAUD P.O., TVPM-009

DEPARTMENT OF ELECTRONICS

CERTIFICATE

*This is to certify that the project report entitled **"IOTACCESS CONTROL BASED ON FACE RECOGNITION"** is a bonafide recordof the work done by **A.AYANA, ANJU.S, JIYA JACOB, MEENU.S.M** of National College, Thiruvananthapuram towards the partial fulfillment of the requirement for the award of the degree of Bachelor of Science in Electronics of the University of Kerala during the period 2014-2017.*

Mr. Sudheer.A **Mr. Madhusoodanan Pillai.TG**
Project Co-ordinator **H.O.D**

…… **……..…….**

External Examiner **Dr. Abdul Rahim. M**
Principal

ACKNOWLEDGEMENT

First of all, I wish to acknowledge my deepest gratitude and indebtedness to the creator whose all-providing munificent has ever ceased to amaze me at every stages of this project.

I would like to offer gratitude to my parents for showering their blessings and wholehearted support.

I express my sincere thanks and a deep sense of humble gratitude to our Principal, **Dr.Abdul Rahim.M** for providing suggestions and his kind interest in providing the best facilities.

I express my heartfelt gratitude to **Mr.Mr.MadhusoodananPillai.T.G,** Head of the Department of Electronics for his encouraging and valuable advices.

I take this opportunity to express my gratitude to **Mr. Sudheer.A,** the project co-ordinator who gave an enthusiastic support throughout the seminar.

I take this opportunity to express my gratitude to **Smt. Biny Mary Varghese** lecturer of Electronics, for giving valuable suggestions and support.

I also thank all lecturers of Department of Electronics whose valuable suggestions and active participation that made the seminar a success.

Last but not least, I express sincere thanks to all my friends for theirsupport.

IOT ACCESS CONTROL BASED ON FACE RECOGNITION

ABSTRACT

Smart home security control system has become indispensable in daily life. The design and development of a home security system, based on human face recognition technology and remotely monitoring technology, to confirm visitor identity and to control door accessibility has been reported in this paper. This paper describes about the implementation and deployment of wireless control system and accessibility in to a home environment for authenticated people only. A wireless network technique using Wi-Fi module based and image processing technique PCA based, dedicatedly make the security system alive as per the request. Wi-Fi module and electromagnetic door lock module combined operate the door accessibility has been designed and developed. Face detection and recognition algorithms, as well as a wireless interface are used to detect and identify visitors and send an email and/or an alert message about the current home environment status via GSM network automatically to the home owner's mobile phone or any communication devices.

The concerned authority can control the system through his/her mobile phone or any communication devices by sending AT Commands to GSM MODEM or by taking necessary actions for authentication through email, which is again password protected. Users can monitor visitors and control the door lock on active Web pages enhanced with JavaScript and HTML. This system finds a wide application in areas where physical presence is not possible all the time. The entire control system is built using ATmega328 microcontroller and tested for actual use in home environment.
